

Amanda Clarke is a Program Manager in Research & Development at EVMS in the Department of Obstetrics and Gynecology. She is responsible for communications, strategic planning, implementation and maintenance of program activities.

Amanda has more than 15 years of experience in community health and research. Her current research interests include community-based participatory research, health policy and health equity, and maternal and infant-child health disparities. She has been successful in roles that developed her expertise as a community health advocate as well as her love for Influencing health outcomes across multiple acculturation levels and socio-economic groups. She currently serves as the Fundraising Chair for the Young Professionals Board of the Hampton Roads American Heart Association, and Research Team Member of Project Nana.

Amanda is a mentor, life-long learner, and transformational leader.

Some of Amanda’s academic accomplishments include an earned B.S. in Biology from Norfolk State University, M.S. in Medical Science from Hampton University, and a M.S.H.S. in Clinical and Translational Research from George Washington University’s School of Medicine & Health Sciences. She is a dreamer that loves adventure, travel, and winning.

Amanda resides in Virginia Beach with her husband and two sons.
